

Where We Stand on the Environment:

- **Our region must lead** on environmental measures that protect our climate for our children while enabling more alternatives for safe transportation for everyone.
- **Community Choice Energy:** I support Community Choice Energy. I believe we need to be honest about the costs, but it is critical for the long-term benefits to climate change.
- **Alternative Transportation:** I support full bus electrification to limit the environmental impacts of transit and will explore shared autonomous vehicle pilot programs to improve our system.
- **Bicycles/Pedestrians:** I support the County fully adopting Vision Zero principles to better support the safety of our children, seniors, and mobility challenged and create more walkable and bikeable communities.

OMAR PASSONS
FOR SAN DIEGO COUNTY SUPERVISOR

Where We Stand on Cannabis:

The County of San Diego should ensure legal, safe, regulated access to medicinal and recreational Cannabis throughout the region.

- **Overturn the ban:** The County must overturn its ban on cannabis and move towards safe, regulated access from farming and cultivation through manufacturing, distribution, and retail.
- **Shut down illegal operators:** Illegal dispensaries and black market delivery hurts us all and the County must work with law enforcement to stop them.
- **Banks, not moneybags:** The County must lead on pushing for state and federal action on banking to remove the health and safety issues of being an all cash industry.
- **Taxation and Compliance:** We must have a local framework for ensuring businesses comply with the law and pay the taxes they owe.
